

# Lights & Sound with Arduino

Hacksburg and [Let's Code Blacksburg](#) are partnering for this level two class for all ages.

This class is designed for those who have used an [Arduino](#) before, but need to learn about enhancing their device. We will be having our Arduinos control lights, and make sound. No supplies need! Kits are provided for you to learn on (but not bring home).

We will make the Arduino play sound files, and control series of lights.

You can then use your new skills on your own Arduino projects.

Date: DELAYED DUE TO NOT ENOUGH TICKETS PURCHASED

Where: Hacksburg [2200 Kraft Drive, Suite 1475, Blacksburg, VA](#)

Taught by: Thomas Weeks

This class is a part of the [cosplay class series](#)

Attendees should be 16 or older

Price: \* \$10 public \* \$5 Members

## Buy Tickets

There is a minimum of 4 and maximum of 12 attendees. Buy your tickets here:
